HOBBIES

Music has played a big part of my life since my early childhood. I started playing violin and piano when I was three years old and reached later even a professional level. . In addition to music, I love doing sports. I've had several show jumping horses and have been competing in national level when I was younger. I've also competed in powerlifting in national level and I'm an owner of a bronze medal from Southern Finnish Championships 2019. After having two children I haven't competed but going to gym is still a dear hobby.
